THE VISION

Stanford Open is a non profit group organized to benefit the communities in Judith Basin County. Our main fundraising event is our annual golf tournament. In 2020, we decided to use the proceeds from the tournament to improve the fairgrounds arena. There has been very little in the way of improvements over the years to our fairgrounds. Our group looked at the bigger picture, and saw this as an opportunity to make substantial improvements. This chance may not come around again. The fairgrounds is the only venue we have here in Judith Basin County to host events. It's home to our County Fair, CM Russell Stampede, Youth rodeos and other events throughout the year. If we do not act now to preserve and improve this facility for the future, we will lose it and any events that go with it. These events are the life of our communities. In comparison to other county fairgrounds in surrounding counties of similar size, Judith Basin County lags behind significantly. Central Montana is an area people are attracted to. Those people should see vibrancy in Judith Basin County, not a county that is falling behind.

THE GOAL

- Revitalize the county. Bring vibrancy to the fairgrounds.
- Stimulate people coming to our county, and staying in our county after they visit.
- Stimulate people spending money at our businesses.
- Provide opportunities and entertainment for people.
- Upgrade facilities throughout the fairgrounds.
- Create a venue people want to come to.

THE PROJECT

1

GRANDSTANDS

New elevated bleachers seating up to 1,000 people under a covered metal structure to provide shade for the spectators. Replace the old wooden bleachers that are a hazard.

2

CROWS NEST

The new crows nest will provide a safe place for announcers and sound personnel. The current crows nest is a hazard and should be torn down. The new crow's nest will also provide seating for spectators off each side of the announcer's booth for a unique watching experience.

3

ARENA

The arena will be resized for better viewing while still providing all the space needed for different events that will be possible. The upgrade will include new paneling, pens and chutes. The current paneling, pens and chutes are old and need replaced.

4

COVERED SHADE AREA

A permanent overhead structure will be built in the location where the tent used to be placed. This will eliminate the need to put the tent up multiple times throughout the summer. The area will provide shade for spectators for events held in the arena as well as the 4-H and quickdraw events held by the 4-H pavilions.

5

BATHROOM UPGRADES

The bathrooms will be upgraded to more acceptable standards to meet peoples' needs.

6

LIGHTING AND ELECTRICAL UPGRADES

Lighting around the arena and throughout the fairgrounds will be added to allow for evening and night use. The electricity and lighting throughout the facility currently is inadequate and unsafe.
